SUMMARY

By this Order, Central Maine Power Company's (CMP's or the Company) proposed revisions to Section 1.1 of its Terms & Conditions and its Revisions to the Supplement to the Handbook of Standards Requirements - Meter Mounting, Equipment Requirements, and Options are approved.

DISCUSSION AND DECISION

On October 18, 2004, Central Maine Power Company (CMP) filed with this Commission proposed revisions to its Supplement to the Handbook of Standard Requirements - Meter Mounting, Equipment Requirements, and Options. These revisions reflect changes to, and additions of, manufacturers' catalog numbers for acceptable meter enclosures, thereby providing for more options for meter mounting equipment. CMP also proposed to amend its Terms and Conditions, Section 1.1, to change the date of the "Supplement to the Handbook of Standard Requirements" to September 30, 2004. CMP requests this date in order to effectively cover the available in-service date of these manufacturers' equipment options.

In a November 2, 2004 Order in Docket No. 2004-736, as allowed under 35-A M.R.S.A. § 107(4) and Chapter 110, § 1305 of the Commission's Rules, the Commission delegated its authority to the Director of Technical Analysis to approve changes in a transmission and distribution (T&D) utility's line extension "construction standards" for utility lines, including electric line extensions.

I have reviewed CMP's proposed changes to the Supplement to the Handbook of Standards Requirements, a subset of CMP's Construction Standards, and find them to be reasonable. The revised Terms and Conditions that incorporate these changes are approved.

Accordingly, I
